- Protects more plants than standard quart size.
- Treats 23-28 ornamental shrubs 4' high.
- Adjustable nozzle for multiple spray patterns.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS

For home and garden use only. IMPORTANT: This product contains egg solids, which may cause allergic reactions in some individuals. Not for direct use on plants intended for human consumption (i.e. food plants). Do not allow spray to drift onto plants intended for human consumption. Use this product to repel black-tailed deer (mule deer), white-tailed deer and Roosevelt elk that browse or uproot conifer seedlings. This product can be used to repel white-tailed deer from yew, Scotch pine, arborvitae, Douglas fir, flowering crabapple, hemlock, honeysuckle, azalea, rhododendron, landscape gardens and plantings, ornamental shrubs and fruit and citrus trees. Use this product to repel rabbits from ornamentals and landscape plantings. Before applying, read specific application directions and use cautions below. Store at room temperature. Protect from heat and freezing. Freezing makes **DeFence™ By Havahart®** unusable. This product will stain structural surfaces. Do not apply to siding, roofing, decks, fences, driveways, painted surfaces or other structural material. Do not allow spray to drift onto structural surfaces in areas of application.

APPLICATION DIRECTIONS

Before applying, read and understand all label instructions.

SHAKE WELL BEFORE USING!

Weather Conditions: Do not apply at temperatures below 40°F, or in wet, windy conditions. Apply only in dry conditions and only under conditions favoring prompt drying of spray (lightly breezy, mild dry weather with low relative humidity). If spray is used in wet conditions or in damp, cold, foggy or misty weather, or if precipitation or freezing occurs before spray can dry, protection may be partially or completely lost.

New Conifer Seedlings: New seedlings to be protected from winter browsing must be dormant and frost hardy before treatment. Assure complete coverage of new seedlings to the point of run-off. Once planted, retreat seedlings every 6 weeks during root establishment or as needed if previous treatment appears to

be fading. **Note:** Browning and drop of old needles may occur on some evergreen species after using this product.

Established Conifer Seedlings: Treat each established seedling to be protected. Hold sprayer about 10" vertically above tip of terminal shoot. Spray the terminal and first whorl to run-off. Treat each seedling to be protected.

Yew, Scotch Pine, Arborvitae, Douglas Fir, Ornamental Crabapple, Hemlock, Honeysuckle, Azalea and Rhododendron: To protect against winter browsing: apply repellent upon onset of browsing. If browsing extends beyond two months, seedlings may be re-treated. Apply only to vegetation that is within animals reach. Apply to the point of run-off. † To protect against spring browsing of new growth: apply repellent upon onset of browsing, but preferably after bud break and before new shoots exceed 1" in length. Do not re-treat new growth. If spring browsing reaches unacceptable proportions before bud break, repellent may be applied to unopened buds, but must then be reapplied after new growth averages 4" in length if browsing still persists. Apply to terminal to point of run-off. For large trees, apply **DeFence™ By Havahart®**, only to lateral branches that are within animals reach. † **Note:** Browning and drop of old needles may occur on some evergreen species after using this product.

Ornamental Shrubs: Do not apply during bud break or flower bloom, as foliage injury and petal drop may occur. Apply only to areas of vegetation that are within animals reach. Apply to the point of run-off. †

Non-bearing Fruit and Citrus Trees: For use on non-bearing fruit & citrus trees only. Use when trees are dormant, not when actively growing. Do not apply during bud break or flower bloom, as foliage injury and petal drop may occur. Apply only to vegetation that is within animals reach. Apply to the point of run-off. †

Landscape Gardens: Do not apply to landscape plantings during bud break or flower bloom, as foliage injury and petal drop may occur. Apply to areas of vegetation that are within animals reach. Apply to the point of run-off. †

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

Pesticide Storage: Store only in a cool, dry area inaccessible to children and pets. Protect from freezing and heat. Keep container tightly closed to prevent evaporation.

Pesticide Disposal: Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: If Empty: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. **If Partly Filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

† Reapply every 14 days or as needed if the previous treatment appears to be fading.

Hazards to Humans and Domestic Animals.

CAUTION: Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

FIRST AID

If on Skin or Clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes
- Call a poison control center or doctor for treatment advice.

If in Eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Information Center at 1-800-858-7378 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

For terrestrial uses: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

Note: Seller warrants that this product complies with the specifications expressed in this label. To the extent consistent with applicable law, seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. To the extent consistent with applicable law, Seller's liability or default, breach or failure under this label shall be limited to the amount of the purchase price. To the extent consistent with applicable law, Seller shall have no liability for consequential damages.

SATISFACTION GUARANTEED If for any reason you are not 100% satisfied, Woodstream will refund the suggested retail price or replace this product. Woodstream will not be liable for any damage, direct or incidental. Refund or replacement product is our only obligation. Call 1-800-800-1819 ext. 490.

*Repels deer for up to 3 months

** When used as directed

Clearing a Clogged Sprayer

1
Twist the sprayer cap loose to remove the pressure inside the bottle.

2
Remove the small metal tip by unthreading.

3
Scrape the inside of the nozzle if any debris exists.

4
Ensure hole in end of nozzle is clear, able to see straight through. If clogged use a toothpick or paper clip to clear the clog.

Remove red nozzle extension.

Check if orifice is clogged.

Firmly tap the end of the red nozzle extension on a table top expelling solidified product.

Alternate method for hardened clogs is to use a paper clip to clear the orifice.

Example of clogged nozzle extension.
