

Victor®

Victor® Kill & Seal Instructions

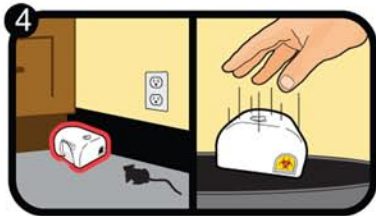

- Unscrew the bait sealing hatch on the top of the trap.
- Place a little bit of peanut butter inside the hatch.
- Screw the hatch back into the trap.

- Push the red trap handle down to open the patented red fluid-tight door and set the internal kill bar.

- Place the trap next to a wall with the red door closest to the wall.
- For best results, place multiple traps at 2 to 3 foot intervals along walls in different areas of the home where rodents travel.

- When a mouse and its disease-carrying parasites are caught, the red trap handle will move to the upward position and the red fluid-tight door will seal shut.
- Simply throw away the one-time use disposable trap.
- Do not push the red trap handle back down as parasites may then escape when the door opens.

Note: Woodstream is not responsible for damage to this product that results from misuse or actions contrary to these instructions.
