

Live Catch Mouse Trap

Instructions

1. Open the door of the trap.
2. Bait the trap using peanut butter or anything high in protein like chocolate or hazelnut spread in the back of the trap. Be sure to use a Q-tip, toothpick or another tool to bait so your scent is not transferred onto the trap.
3. Place the trap where you have seen signs of rodent activity or along the wall where rodents primarily travel. The trap should be placed lengthwise against the wall with the entrance hole nearest the wall.
4. Placing 2 traps back to back will help your chances to catch more mice.
5. After a mouse is caught and with the door facing away from you, lift the door to release the mouse. We recommend releasing the mouse at least two miles from your home or business to discourage it from returning.
