

Mini PRO PestChaser®

Instructions

1. Plug the PestChaser into the lower socket of a 110V-AC wall outlet. The ideal placement for the Mini PRO PestChaser is close to the entrance of the room. We recommend using one Mini PRO PestChaser per average size room. The Mini PRO PestChaser is ideal for garages, basements, attics, etc. because of its mini size and industrial design.
2. The red LED light will illuminate showing the unit is functioning properly.
3. Clear all surrounding objects away from the PestChaser. The ultrasound emitted from the PestChaser does not travel through walls, furniture, cabinets, or any other object.
4. Then, just sit back, relax and forget. Reduction in rodent activity should occur within 6-10 days.
